

◆ BUILDING SINCE 2018

Custom software for **complex organisations**

We design, build and support business-critical software for Australian councils and mid-market operators, all from our in-house team in Brisbane. No offshoring, no subcontracting the hard parts.

TYPICAL PROJECT ENTRY

◆ WHAT WE DO

Designed, built and supported by our own team.
No subcontracting the hard parts.

Four ways we remove operational friction

01

Custom software

Bespoke systems for organisations that have outgrown spreadsheets and off-the-shelf tools.

02

Mobile & web apps

Native mobile apps and secure web apps that work wherever your team does.

03

Integration & AI

Linking the tools you already run so data flows once, while applying AI where it genuinely earns its place.

04

Software consulting

Independent advice on what to build, what to buy, and what to leave alone.

◆ SELECTED WORK

Full case studies at codecabin.com.au/work

What we've actually built

ProMaps

PROVAC

Underground utility networks, rendered in 3D

20+ locators · 100,000+ features mapped

Catering Industries

NATIONAL OPERATOR

One operating hub for a national workforce

1,800+ staff · 200+ locations

CIM-PRO

SAAS

From internal software to international SaaS

600+ deal makers · \$1b+ deals closed

Brisbane City Council

LOCAL GOVERNMENT

Keeping Brisbane's ferry terminals safe

22 terminals · real-time reporting

◆ HOW WE WORK

You deal with a director throughout — not an account manager.

Clarity before code

STEP 01

Understand

Get close to the operation, the users and the real constraint.

STEP 02

Shape

Define the smallest valuable solution and a delivery plan everyone understands.

STEP 03

Build

Work in visible increments with regular demonstrations.

STEP 04

Evolve

Support the solution after launch and keep improving it.

Pre-qualified for government procurement

Local Buy LB308 (ICT Solutions) and registered on buy NSW, giving councils and eligible entities a compliant pathway to engage us.
